OBJECTIVE

Results-driven Computer Science Engineering student specializing in Cybersecurity and Blockchain Technology with hands-on experience in web development (Django, MERN Stack) and cloud computing (AWS). Completed internships with ISRO and Vehinova Technologies, demonstrating expertise in secure application design and ethical hacking. Skilled in Agile collaboration and performance optimization, passionate about advancing cyber defense systems and innovative software solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Jul 2022 - May 2026
Koneru Lakshmaiah University, Guntur.
CGPA : 9.35/10

TECHNICAL SKILLS

Programming Languages	C, Python, Java(Basic), JavaScript(Basic), Git Bash
Web Development	HTML, CSS, Django, React.js, Node.js, Express.js, Bootstrap, Python
Databases	MySQL, PostgreSQL, MongoDB, SQL.
Cloud and Tools	AWS (Basic), CA/CD, GitHub, VS Code, PyCharm, Linux (Shell), Copilot, MS Office, Power BI, Postman
Concepts	Agile, Kanban, Scrum, SDLC, REST APIs, Unit testing, Maven, Microservices, NoSQL, Authentication, Authorisation, MFA, IAM, RBAC, Zero trust
Specialized Areas	Cybersecurity, Encryption, Nmap, Burpsuite, Kali linux, Ethical Hacking, Network Security, Blockchain Fundamentals, Cryptography

PROJECTS

Online Blogging System - Core Developer December 2023 - April 2024

- Designed and implemented a full-featured blogging platform with modules for user registration, post creation, and commenting using Django Framework.
- Utilized Django ORM for database integration and PostgreSQL for efficient data storage and retrieval.
- Integrated secure authentication and session management to protect user credentials and prevent unauthorized access.
- Deployed the project using GitHub version control and followed MVC architecture for maintainable code design.
- Enhanced user experience with Bootstrap-based responsive UI, achieving seamless usability across devices.
- Implemented input validation and security measures (CSRF protection, password hashing, and form sanitization) to safeguard against vulnerabilities like SQL injection and XSS attacks.

Hospital Management System - Backend Developer July 2023 - November 2023

- Engineered a full-stack hospital management portal automating patient registration, appointment scheduling, and staff management.
- Developed and integrated RESTful APIs to connect frontend (React.js) and backend (Node.js/Express.js) efficiently.
- Utilized MongoDB for dynamic data handling and optimized queries for real-time updates.
- Designed role-based access control (RBAC) to ensure secure data handling for doctors, patients, and admins.
- Improved application performance and responsiveness by 25% through optimized API calls and modular component design.

INTERNSHIPS / TRAININGS

- Vehinova, Vijayawada — Summer Internship

May 2024 – Jun 2024

 - Completed a 6-week internship focused on MERN stack web development.
 - Designed and developed responsive web pages using React.js for the front end.
 - Created backend APIs using Express.js and Node.js for handling requests and data processing.
 - Connected the application to MongoDB Atlas for cloud-based data storage.
 - Tested features to ensure proper functionality and fixed bugs during development.

- ISRO, Remote — Training

April 2024 – May 2024

 - Completed specialized training under ISRO’s START program, focusing on space research, cybersecurity, and satellite communication systems.
 - Conducted research on secure communication protocols and their application in space data transmission.
 - Designed a conceptual model for secure cloud-based data management for satellite operations.
 - Explored cyber resilience frameworks for protecting satellite networks against potential space-cyber threats.
 - Presented a technical report and prototype proposal on “Secure Data Handling in Space Networks” to mentors and ISRO professionals.

CERTIFICATIONS

-Aviatrix Certified Multicloud Network Associate	February 2026
-Automation Anywhere Certified Essentials RPA Professional	November 2025
-Red Hat Certified Enterprise Application Developer	December 2024
-Salesforce Certified AI Associate	November 2024
-Fintech Professional Certificate	July 2024
-Hackerrank Certified Intermediate Level of SQL	May 2024

EXTRA-CIRRUCULAR ACTIVITIES AND ACHIEVEMENTS

- Participated in Hackathons and CTF challenges focusing on penetration testing and ethical hacking.
- Lead Sweccha NGO- contributed to community-driven initiatives, sustainability campaigns and explored open source workshops.
- Collaborated with volunteers to organize outreach and awareness events on social development and innovation.
- Member of the Cyber Security Club at KL University, assisting in workshops on Python, analytics, and cybersecurity.
- Completed Salesforce trail quests to attain agent blazer status and ranked Mountaineer.
